

## A message from Editor-in-Chief

Dear statistics community:

It is a great pleasure for me to make available to you the first issue of Volume 7, published in 2016 by the the Chilean Journal of Statistics, an official publication of the Chilean Statistical Society. Five papers are included in this issue. These papers cover topics on: Regression analysis, Distribution theory, Sampling theory, Time series and Financial applications. I would like to thank the researchers and internationally renowned statisticians who have honored us by choosing our journal to publish some of their research. I would like to thank the collaboration of several referees, whose excellent and anonymous work have made possible the publication of this issue.

I would also like to thank Dr. Manuel Galea, the former Editor-in-Chief of the ChJS for the efforts and dedication to maintain the quality standards of our journal and for motivating people to contribute to this journal.

Best regards to all,  
Ronny Vallejos  
Editor-in-Chief  
Chilean Journal of Statistics
